Experience

Product Owner, Full Stack React Developer (Remote) | Taiwan (Remote) | Jan 2024 - Present

- RadSoftware
 - Develop user interfaces (UI) and interaction flow based on Figma designs.
 - Maintain high-quality React, TypeScript, and Node.js codebase and write clear documentation.
 - Act as the primary point of contact for international contractors and providers.
 - Integrate third-party providers' APIs.
 - Collaborate across time zones, languages, and cultural differences.
 - Review code contributions by other developers to ensure codebase quality.
 - Identify potential security risks and performance bottlenecks and implement mitigations.

Full Stack Java/Spring Developer | Taiwan | Sep 2020 - Aug 2023

- Wistron ITS
 - Develop outward/client-facing web pages using the Spring framework for insurance systems.
 - Develop RESTful API endpoints for headless backend systems.
 - Develop internal-facing websites as part of insurance CRM systems (CRUD operations, forms, tables, search, filter, PDFs).
 - Consistently meet Agile weekly goals and occasionally exceed KPIs.
 - Communicate effectively with System Analysts (SAs) to clarify specifications and avoid blockers.
 - Review colleagues' code commits to maintain quality control.
 - Write JUnit tests and Selenium automated tests for quality assurance.

Full Stack Java/Spring Developer | Taiwan | Sep 2020 - Aug 2023

- Pershing Technology Services Corporation
 - Exceed expectations by resolving bugs in a Test-Driven Development (TDD) style ahead of deadlines.
 - Deliver RESTful Java servers with Spring within short Agile cycles.
 - Develop back-end using MVC pattern, Java, Spring, Gradle, T-SQL, JPA, Apache POI, Tomcat, Docker, and VirtualBox.
 - Develop front-end using HTML5, JavaScript, jQuery, React.js, AJAX, JSP, Mustache, and CSS.
 - Replace legacy SWIFT system with a RESTful Web API at Bank SinoPac (永豐銀行/永豐金融控股).

Education

Graduate of Cross-Platform Java Engineer Bootcamp (Class of Oct 2019) | Taiwan | Oct 2019 - Apr 2020

- Institute for Information Industry (資訊工業策進會)
 - Develop server-side/backend Java to handle business logic and data fetching with the Fetch API in a Spring MVC project.
 - Develop client-side/frontend Java in JSTL to handle data fetching with jQuery AJAX.
 - Develop Java interfacing with MSSQL databases using Hibernate and JDBC.
 - Manage external libraries with Maven in Spring projects.
 - Manage project version control and collaborated on code reviews using GitHub.

Bachelor of Arts (BA), Major in International Affairs | USA | Sep 2011 - Apr 2016

- Northeastern University
 - Minors: Political Science, History, East Asian Studies
 - Co-operative (co-op) internship at the International Institute of New England (Boston) facilitating refugee resettlement by teaching adults English, cultural etiquette, and job development.
 - Co-op internship at the Land Mine Relief Fund in Cambodia curating museum displays, translating and recording audio tours, and teaching English.

Skills

- Programming Languages: TypeScript, React, JavaScript, Node.js, Java, SQL, Python
- Frameworks & Libraries: Sequelize, Spring, Spring Boot, Next.js, Express.js, Django, Git, Hibernate, jQuery
- Other: Ajax, Unit testing, English, Chinese (Mandarin)
